Product Portfolio

A public overview of the I am J consumer platform, coordinated AI experiences, and enterprise product direction.

Two product pathways built on one shared intelligence platform.

The consumer and enterprise products share the same core principles: natural interaction, modular AI services, real-world context, multilingual access, responsible design, and cloud-native infrastructure.

I am J

A production mobile AI companion designed to help people understand, navigate, discover, communicate, see, and act through one coordinated experience.

J-SPARK Nexus

A deployable intelligence platform under development for institutions that need managed, multilingual AI knowledge access beyond conventional software delivery.

Artificial intelligence designed for everyday life in the real world.

I am J brings together conversation, navigation, visual understanding, multilingual communication, discovery, safety-oriented assistance, and live contextual information in one mobile experience.

Current Availability

- Available through the Apple App Store
- Distributed across 125 countries
- Supports 21 languages
- Seven-day free trial
- Fifty JCoins welcome credit
- Google Play rollout planned

Six specialized experiences coordinated through one conversational platform.

AI Prodigy

The conversational intelligence core that interprets intent, maintains context, coordinates services, and responds naturally.

AI Pathfinder

Conversational route guidance, nearby discovery, geospatial context, travel information, and real-world navigation support.

Voice-first intelligence with intuitive visual navigation.

Users can speak naturally to J or move through enhanced drawer menus, visual controls, and contextual cards. The interface is designed to make a feature-rich platform feel discoverable rather than overwhelming.

Ask J

Natural voice interaction for navigation, questions, discovery, translation, and feature access.

Enhanced Drawer Navigation

Users can also open and tap intuitive menu drawers for direct control and fast feature discovery.

A usage-based model aligned with real AI and cloud consumption.

J-Coins are prepaid service credits used to access eligible AI and cloud-powered features. They connect user activity to the measurable infrastructure cost of model inference, API calls, speech services, geospatial processing, and serverless execution.

Sustainable

Usage-linked credits help align platform consumption with actual operating cost.

Understandable

Users can see that advanced AI interactions consume real cloud, API, and model resources.

The Voice of Knowledge Delivered Anywhere on Earth

J-SPARK Nexus is a fully autonomous, conversational AI deployment platform designed to bring knowledge access to environments where traditional infrastructure fails. It is not simply software. It is deployable intelligence infrastructure.

NOMAD

A portable briefcase deployment designed for remote schools, NGOs, field teams, humanitarian operations, and temporary environments.

A permanent or semi-permanent deployment model designed for campuses, community centers, institutions, agencies, and enterprises.

- One to five managed tablets
- Portable connectivity architecture
- Collapsible solar power option
- Rapid deployment workflow
- Institutional identity and access
- Designed for remote and field environments

- Scalable pod architecture
- Support for larger device fleets

Designed for organizations that need more than a consumer application.

Organization Identity

Institution-aware accounts, access controls, and deployment context.

Managed Policies

Organization-level rules, safeguards, feature configuration, and governance.

Managed Devices

One platform foundation adapted to different users and operating environments.

Dimension	I am J Consumer	J-SPARK NOMAD	J-SPARK GRID
Primary audience	Individuals and everyday users	Remote schools, NGOs, field teams, temporary operations	Institutions, campuses, agencies, enterprises, community hubs
Delivery model	Personal mobile application	Portable briefcase deployment	Permanent or semi-permanent pod deployment
Device model	User-owned iPhone	One to five managed tablets	Scalable managed device fleet
Identity	Individual account	Organization-aware deployment	Institutional identity and centralized administration
Connectivity	Standard mobile and Wi-Fi networks	Portable connectivity for field deployment	Institutional network and resilient connectivity options
J-Coin model	Individual subscription or top-up	Organization credit pool	Organization and deployment-level credit management
Governance	Consumer policies and user controls	Deployment procedures, safeguarding, and organization controls	Enterprise governance, reporting, policy, and institutional oversight

Consumer and enterprise products are connected through one modular architecture.

AI Prodigy Orchestration

Intent, context, policy, service routing, and response composition.

Cloud Microservices

Independent services for language, navigation, vision, SOS, notifications, accounts, and enterprise functions.

Live Data & APIs

A staged path from production consumer platform to validated institutional deployment.

Strengthen Consumer Adoption

Improve onboarding, retention, discovery, quality, performance, and user evidence.

Broaden Platform Availability

Advance Google Play distribution and extend supported device access.

Complete Organization Controls

See how I am J connects personal AI, enterprise deployment, and real-world knowledge access.

Continue into the technology, architecture, research, impact, and partnership materials behind the product ecosystem.

Continue with confidential technical evidence

Request deeper architecture, platform, validation, roadmap, and implementation materials for institutional review.

Help Unlock Human Potential

I am J is already reaching people in 125 countries and 21 languages. Your support helps extend trusted conversational knowledge to more students, families, educators, humanitarian organizations, and underserved communities.
