About this resource

The following descriptions are approved background language for articles, company profiles, startup directories, conference programs, and institutional materials. Editors may shorten for space while preserving factual meaning.

Short description - approximately 50 words

I am J Corporation develops human-centered artificial intelligence that connects natural conversation, multilingual knowledge access, navigation, visual understanding, guided experiences, local exploration, and safety-oriented assistance. Its consumer platform is available through the Apple App Store in 125 countries and supports 21 languages, while Spark Nexus enterprise infrastructure is under development.

Medium description - approximately 100 words

I am J Corporation is a Palo Alto, California technology company developing human-centered artificial intelligence for individuals, organizations, and communities. The production I am J consumer platform brings conversational intelligence, AI-assisted navigation, guided tours, local exploration, visual understanding, and safety-oriented support into one multilingual mobile experience. It is available through the Apple App Store in 125 countries and supports 21 languages. The company is also developing Spark Nexus, deployable AI knowledge infrastructure designed for enterprise, education, humanitarian, public-service, and remote environments through portable NOMAD and permanent GRID deployment models.

Extended description - approximately 250 words

I am J Corporation develops a coordinated artificial intelligence ecosystem designed to make useful knowledge and real-world assistance easier to access across languages, devices, and environments. Headquartered in Palo Alto, California, the company operates the production I am J consumer platform, available through the Apple App Store in 125 countries and supporting 21 languages.

The consumer platform combines six coordinated experiences: AI Prodigy for conversational assistance; Pathfinder for navigation; Guided Tours for cultural and location-based discovery; Explorer for local and outdoor exploration; Sight & Tell for visual understanding; and SOS for informational safety guidance and user-configured emergency-contact support.

I am J Corporation is also developing Spark Nexus enterprise infrastructure for institutions, education programs, humanitarian organizations, public services, and remote communities. Its planned NOMAD and GRID deployment models are intended to support portable and permanent knowledge-access environments, including settings where conventional infrastructure may be unavailable, unreliable, or insufficient.

The company publishes public information about its technology, architecture, responsible AI principles, governance, social impact, and deployment approach through the I am J Technology & Innovation Center. Its mission is to expand trusted knowledge access while maintaining human oversight, transparency, accessibility, privacy, safety, and responsible institutional deployment.

Usage note

Use the company name as “I am J Corporation” on first reference. “I am J” may be used for the consumer platform or as a shortened company reference when the context is clear. “Spark Nexus” refers to the enterprise platform under development.
