

I am J Corporation Opens the Innovation Center as a Public Home for Technology, Governance, and Impact

The public portal brings together company information, architecture, responsible AI, product resources, media materials, and institutional documentation.

Prepared: August 2026

Dateline: Palo Alto, California

Release ID: PRESS-004

PALO ALTO, Calif. - I am J Corporation announced the opening of the I am J Technology & Innovation Center, a public portal created to make the company's technology, governance approach, product direction, and social-impact objectives easier to understand and evaluate.

The Innovation Center serves as the company's authoritative public source for technical overviews, responsible AI resources, product information, enterprise-development plans, public documentation, and media materials.

A public source of record

The portal is structured to help journalists, developers, institutions, grant reviewers, partners, customers, and members of the public locate consistent information about I am J Corporation and its platforms.

It includes sections covering vision, technology, architecture, products, impact, responsible AI, legal resources, leadership, research, roadmaps, and deployment models.

“The Innovation Center gives people one place to understand what we are building, how we are approaching responsible AI, and where the platform is headed. Public trust begins with clear, accessible information.”

Hernan Clarke, Founder and Chief Executive Officer, I am J Corporation

Transparency and responsible development

The Innovation Center provides public access to governance principles, responsible AI documentation, data-protection materials, deployment principles, and related trust resources.

These materials are intended to support informed review while the company continues engineering, testing, and institutional-development work.

Media and public resources

The new Media Center provides official press releases, downloadable PDFs, public company facts, brand resources, and a permanent archive for future announcements.

The public GitHub repository complements the portal with technology, architecture, research, and responsible AI documentation.

Key points

- Technology and architecture overviews.
- Responsible AI and governance resources.
- Consumer and enterprise platform information.
- Public Media Center and press-release archive.
- Links to GitHub, YouTube, and the Apple App Store.
