

# **I am J Corporation Announces Upcoming Product Hunt Launch of the I am J AI Platform**

The production-ready personal AI platform prepares to meet the global Product Hunt community following its availability in 125 countries and 21 languages.

**Prepared:** August 2026    **Dateline:** Palo Alto, California    **Release:** PRESS-011

PALO ALTO, Calif. - I am J Corporation announced that its production-ready personal AI platform, I am J, is preparing for an upcoming launch on Product Hunt, the global community where makers introduce new technology products and engage directly with early adopters.

The Product Hunt debut will mark the next public milestone for I am J following the platform's release through the Apple App Store. The app is currently available in 125 countries, supports 21 languages, and brings conversation, local discovery, navigation, visual understanding, guided experiences, exploration, and safety-oriented assistance into one mobile experience.

## **A production platform entering a global maker community**

I am J is not launching as a concept or prototype. The consumer platform is already in production and has been designed to help people interact with knowledge and the real world through natural conversation.

The upcoming Product Hunt launch is intended to introduce the platform to founders, developers, product leaders, educators, travelers, researchers, investors, institutions, and early adopters who can evaluate the experience and participate in its next stage of growth.

*"Product Hunt gives us an opportunity to introduce I am J directly to a global community that understands what it takes to build and launch something new. We are arriving with a working product, a public mission, and a clear invitation for people to explore the platform and help shape what comes next."*

Hernan Clarke, Founder and Chief Executive Officer, I am J Corporation

## **One personal AI experience, six coordinated capabilities**

The I am J consumer platform coordinates six primary experiences: Prodigy for conversation and knowledge; Pathfinder for local discovery and navigation; Guided Tours for contextual exploration; Explorer for trails, journeys, activities, performance, and safety context; Sight & Tell for visual understanding; and SOS for sensor-aware informational guidance and optional contact workflows.

These experiences are designed to work together through a conversation-first interface rather than requiring users to manage separate, disconnected AI tools.

## **Public readiness and responsible growth**

The company has developed an Innovation Center, Media Center, and Trust Center to provide public information about the platform, technology, responsible AI approach, governance, security, accessibility, company materials, and media resources.

The Product Hunt launch will invite public feedback while the company continues product refinement, Android development, multilingual expansion, enterprise infrastructure work, and responsible governance.

## Product Hunt launch status

The Product Hunt page is being prepared and the official launch has not yet occurred. I am J Corporation will publish the launch link and timing through its official channels when the listing is live.

This pre-launch announcement is intended to provide accurate background and allow journalists, partners, customers, and community members to prepare to follow the debut.

## Key points

- Upcoming Product Hunt launch; the listing is not yet live.
- Production consumer platform available through the Apple App Store.
- Available in 125 countries and supporting 21 languages.
- Six coordinated AI experiences in one conversation-first mobile platform.
- Public Innovation Center, Media Center, and Trust Center.
- Community feedback will inform the platform's next stage of growth.
